

Any Special Method Required for Lenovo Y50 Laptop System Restore?

Posted by lenovoadmin - 29 Dec 2016 11:11

System Restore is entirely a Windows utility and works within Windows so the manufacturer and model are totally irrelevant. If you meant Factory Reset that should appear on the first black screen when you power up.

In Windows, go into Control Panel>System and find System Restore there. Pick a Restore Point created by the last lot of Windows Updates.
