

Lenovo Y700 won't turn on after i plugged in the charger at 10% battery.plz help

Posted by lenovoadmin - 29 Dec 2016 11:31

Did you make sure the charger cord is connected to the power brick? It can work loose. Next, try a different charger. Try removing the battery, plug it in, turn it on, plug in the battery again. If it still dos not work, remove all power and battery, hold in the power button for about 30 seconds, try again.
