

## My lenovo laptop won't start power

Posted by lenovoadmin - 06 Jan 2017 06:27

---

I suggest you try the hard boot process:

1. remove the battery and disconnect the charger
2. push and hold down the power button for 30 seconds
3. replace the battery and power cord
4. start the laptop normally

This sometimes starts laptops that are stuck in limbo.

Good Luck
