

## My Lenovo laptop - Screen goes black after a few seconds

Posted by lenovoadmin - 06 Jan 2017 07:06

---

Click on Start --> In search bar, type power options and press Enter.

"Select a power plan" window will be opened. Click on "Change plan settings" next to "Balanced (recommended)".

In "Turn off the display", select "Never" from the drop-down menu under both the options "On battery" and "Plugged in".

Now click on "Save changes" button.
