

My Lenovo IdeaPad S10-2 make noises when it is turned on?

Posted by lenovoadmin - 06 Jan 2017 08:29

Hello,

The clicking noise maybe coming from the hard drive. Overtime, your hard drive can collect dust, so what you can do that is really easy is use an air blower or hair dryer (must be on cool air). Use this tool and apply air between all the keys and the back of the device where the hard drive is. Afterwards, you shouldn't be hearing that clicking sound again.
