

Can I use a different watt power adapter?my laptop lenovo thinkpad..

Posted by lenovoadmin - 06 Jan 2017 08:51

Yes, both power adapters should work fine for the Thinkpad. However, there may be limitations for the 65W power adapter: the battery will take longer to recharge and it might not be powerful enough for certain types of usage (ex. watching a DVD while at the same time running HDD intensive applications).
