

Strange Keyboard Input

Posted by lenovoadmin - 06 Jan 2017 10:05

I'm pretty sure is from software... i didn't format my PC for more than 1 a ha f year and i've installed lots of application.

I can't say I'm bothered of this, but you have 2 solutions, I guess...:

1. Format your PC and re-install the operating system.
2. Go with your keyboard to another PC and see if you have the same issue.

Good luck!
