

My lenovo u430 touch won't. turn on after shut down

Posted by lenovoadmin - 06 Jan 2017 10:59

Hi ,

As per the query we understood that you are facing the issue with system not powering on.

I appreciate that you have performed trouble shooting step, also try to check with different battery and different adapter, as this might be the issue with system board, please visit the nearest service centre for further details.
